Owners do three jobs alone.

3

Marketing

No agency to read reviews or watch rivals.

Invoices

No clerk to catch a duplicate or a swapped bank account.

Contracts

No lawyer to flag a 90-day payment clause.

Ask once. A team answers.

01 **Manager routes it**

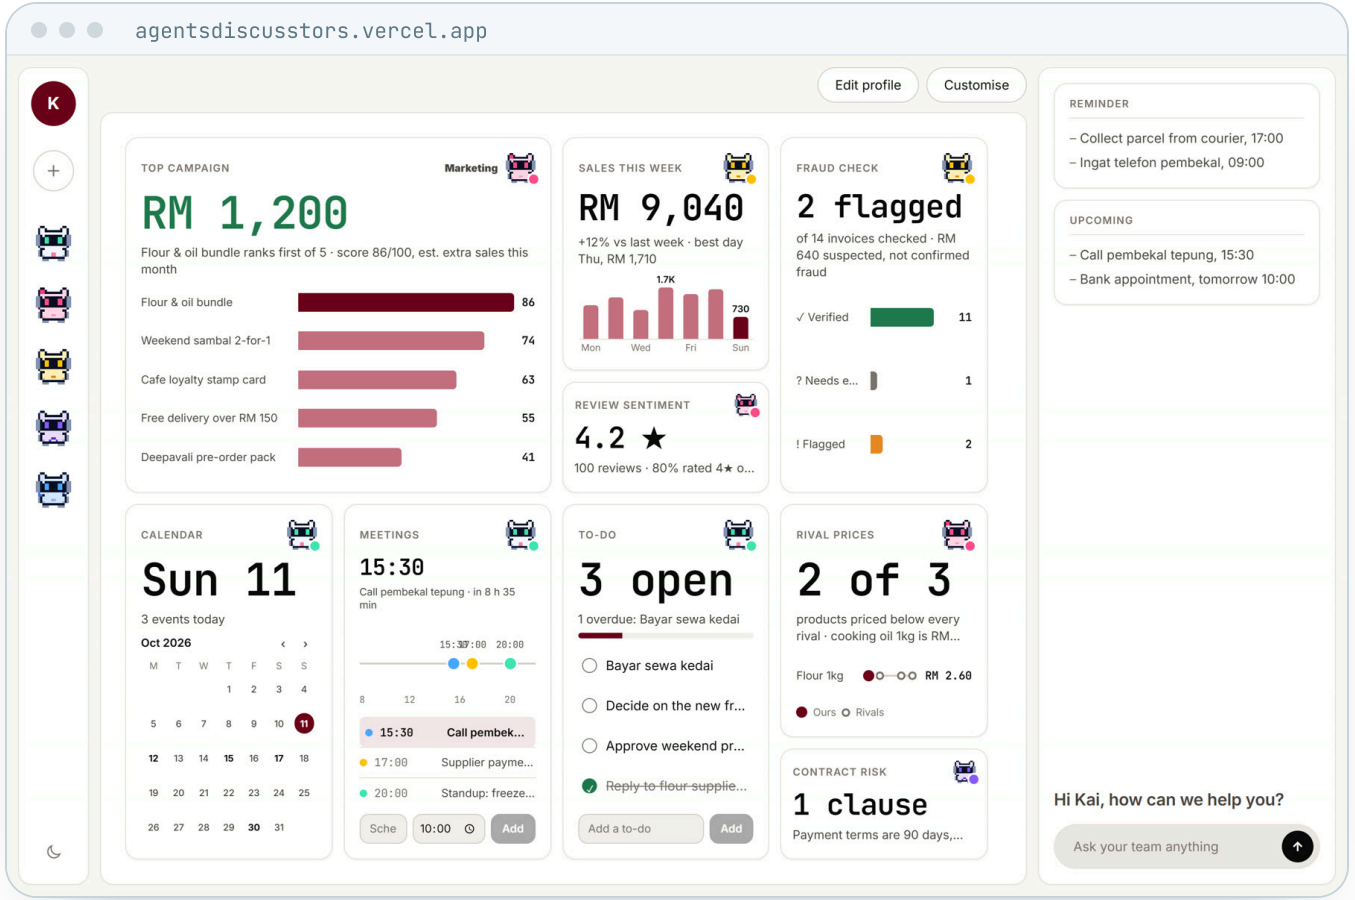

Picks the right specialist and merges the answers.

02 **Specialists do the work**

Marketing, Finance, Legal and a Personal Assistant.

03 **Owner decides**

Nothing goes out without a yes.

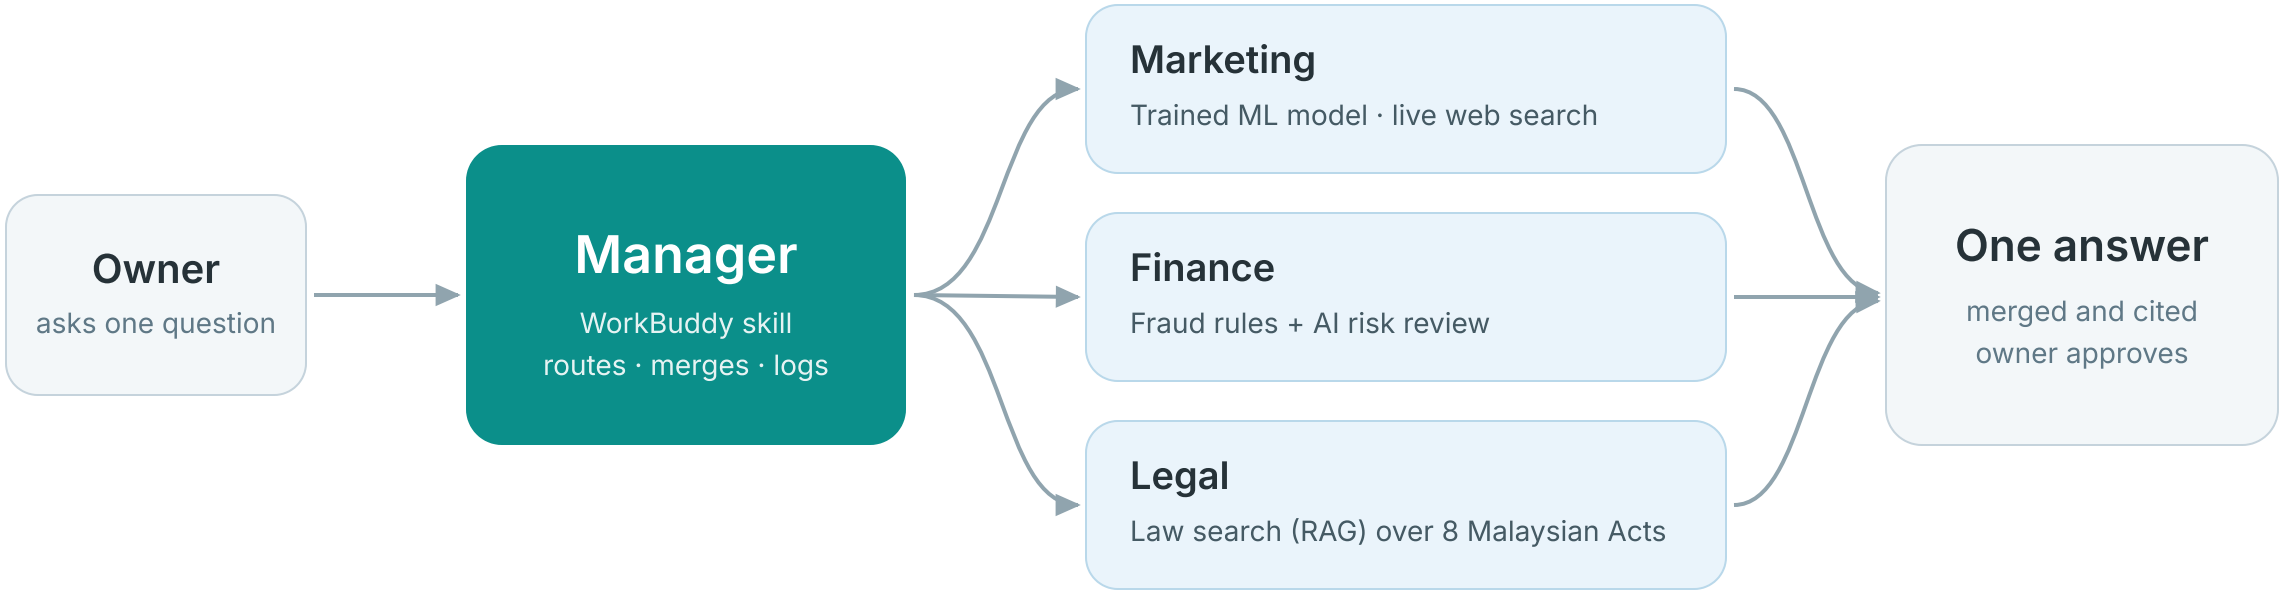

One manager, three kinds of AI.

1 · UNDERSTAND THE GOAL

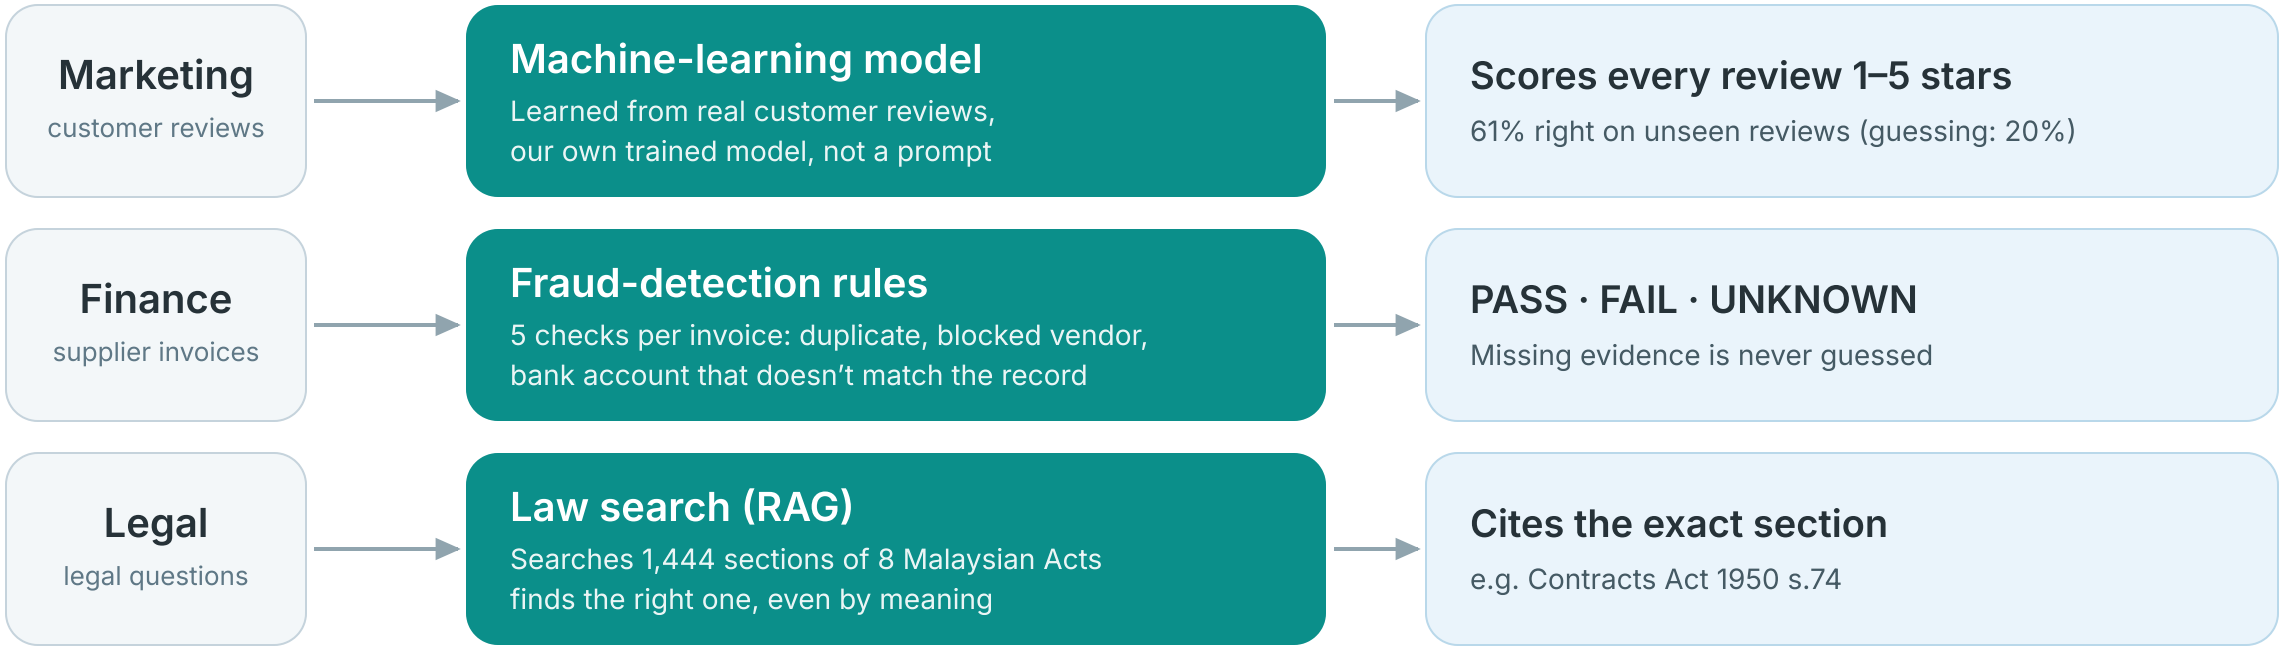

2 · PLAN AND RUN IN PARALLEL

3 · CHECK, MERGE, APPROVE

Next.js · FastAPI · LangChain · LangGraph · WorkBuddy

Not just prompts. Real engines.

WorkBuddy does the work. Owner decides.

WorkBuddy reads the folder · runs the experts · builds the report · sends the alerts

01

Invoice arrives

Dropped in a OneDrive folder. WorkBuddy reads it and cleans the data.

02

Three experts, at once

- Does it match the order?
- Is the bank account suspicious?
- Can this person approve it?

03

Owner reviews

Missing evidence is flagged, never guessed. The owner approves the exact report.

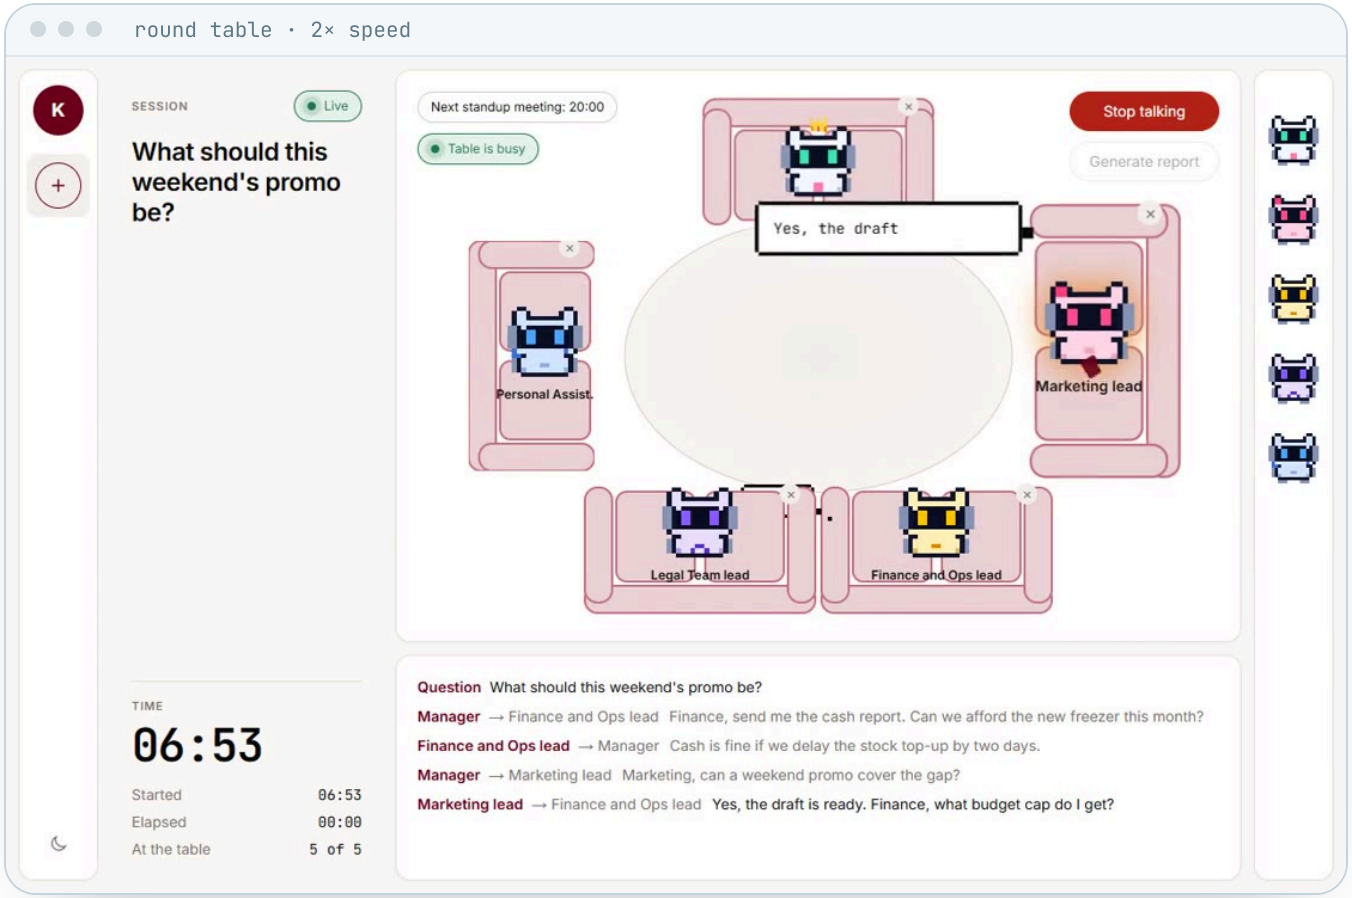

04

Alerts go out

Outlook and Telegram. Approval never triggers a payment.

Our Manager and Marketing agents also run on WorkBuddy, as reusable skills.

See the team at work.

01 Pick a topic

02 Seat the team

03 They discuss. You get one answer.
